Thank you Madame Co-Chairs. My name is Leia Achampong and I am speaking on behalf of Climate Action Network.

CAN hopes that as the APA continues its work it will respond to the sense of urgency being shown by world leaders. With the first CMA meeting taking place in Marrakech, CAN recommends that the development of the Paris Agreement rulebook should continue within the APA - where all countries can participate - to be finalised and sent to CMA for adoption in 2018.

COP 22 should set the ball rolling on the ambition mechanisms built into the Paris Agreement by engaging in thorough discussions on the modalities for the global stocktake.

Parties should also ensure that decisions on adaptation communications identify the capacity building needs of vulnerable countries, including approaches to plan and communicate adaptation requirements in light of different warming scenarios. These decisions should also promote ways to effectively and efficiently communicate adaptation progress for different reporting purposes.

With entry into force of the Paris Agreement, we also look forward to the consideration by the APA of other mandates under agenda item 8, such as those relating to the enhancement of public participation, access to information, training and public awareness.

Thank you.
