CAN welcomes the substantive discussions under SBSTA, SBI, and APA and the progress made here in Bonn.

More tangible progress on key issues is urgently needed and we appreciate the mutual trust and constructive compromise parties made in last night’s APA session that gave clear mandate to make progress from here to Bangkok.

CAN encourages parties to use the time between now and Bangkok to unblock political differences. We believe this can further advance the alignment of interlinkages which can solidify a robust and flexible Paris Agreement Work Program.

We encourage countries to use the upcoming months to send clear signs of mobilizing finance for the replenishment of the GCF and the fulfillment of the $100 bn goal. To build trust and for the ambition cycle to come to life.

CAN expects strong political leadership from the Fijian and Polish presidency to deliver a strong rulebook and step up ambition at COP 24. CAN continues to be fully committed to supporting the delivery of both.

Thank you.
